

Student Guide: Getting Started with Trello

This document outlines how to set up and use Trello to manage your group project effectively.

Part 1: Setting Up

1. Create an Account

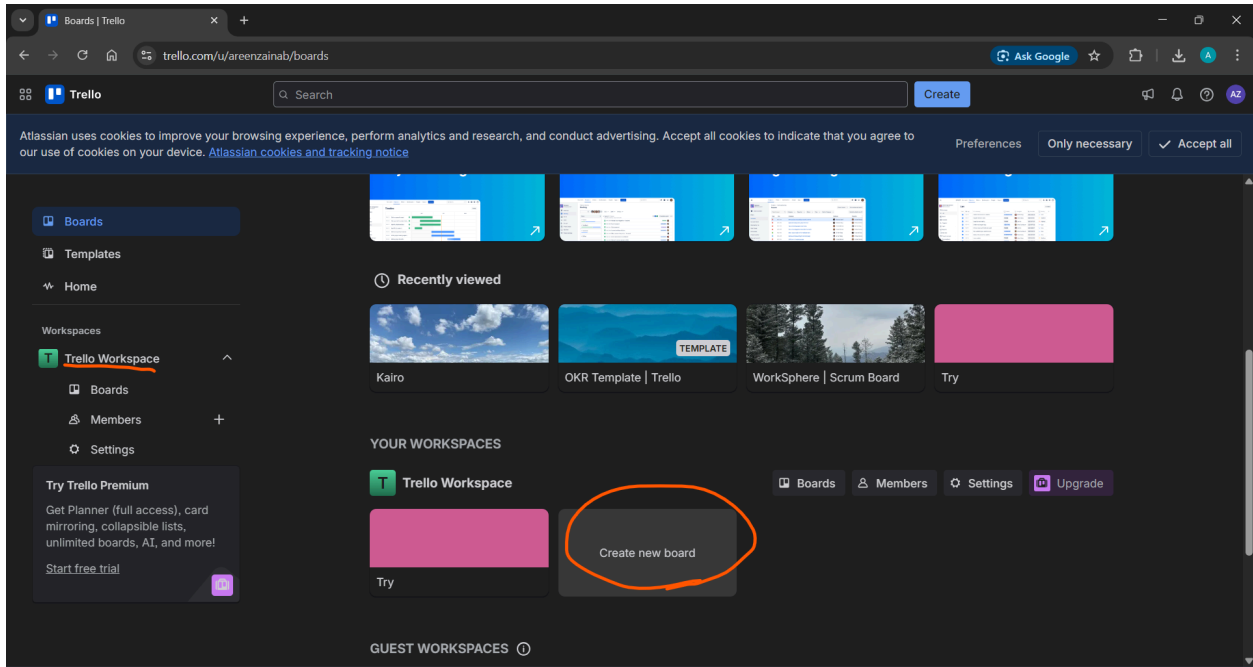

1. Go to trello.com.
2. Click **"Sign up - it's free"**.
3. **Recommendation:** Use the **"Continue with Google"** option using your university or personal Gmail account. It's faster and you won't have to remember a new password.

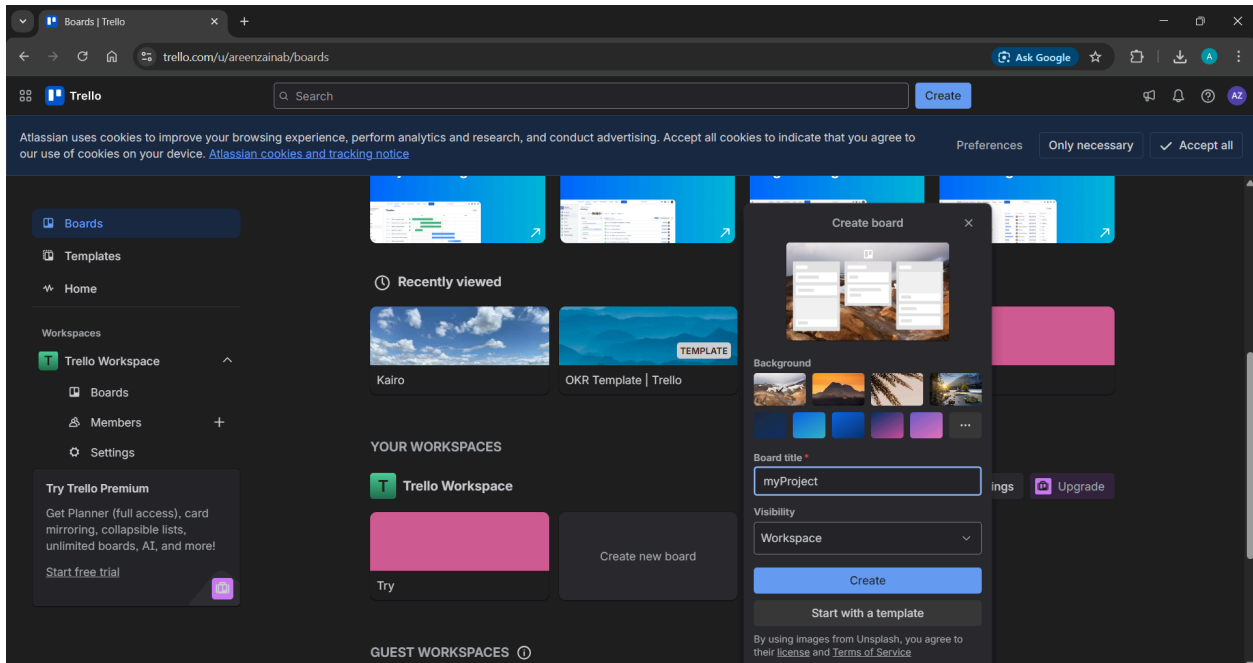

2. Create a Workspace

The "Workspace" is the home for your team where all your project boards will live. A "Board" is where the actual work happens.

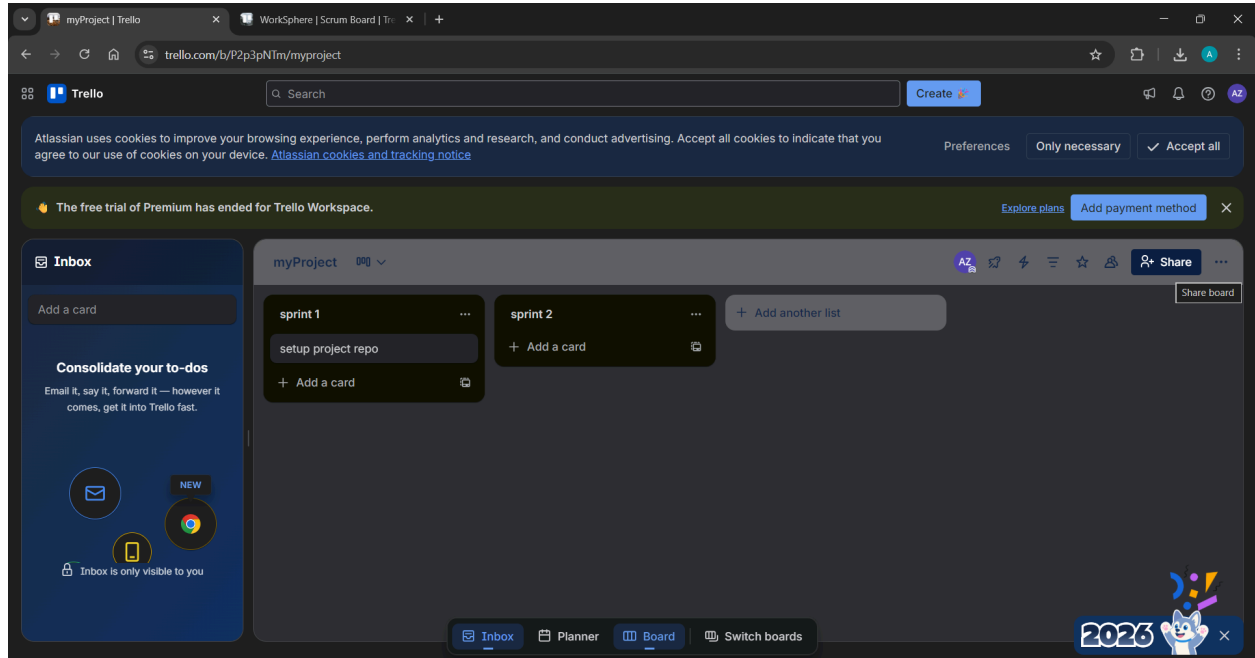

1. Once logged in, go to the **home** screen.
2. Go to **Trello Workspace** under Workspaces. Click on **"Create new board"**

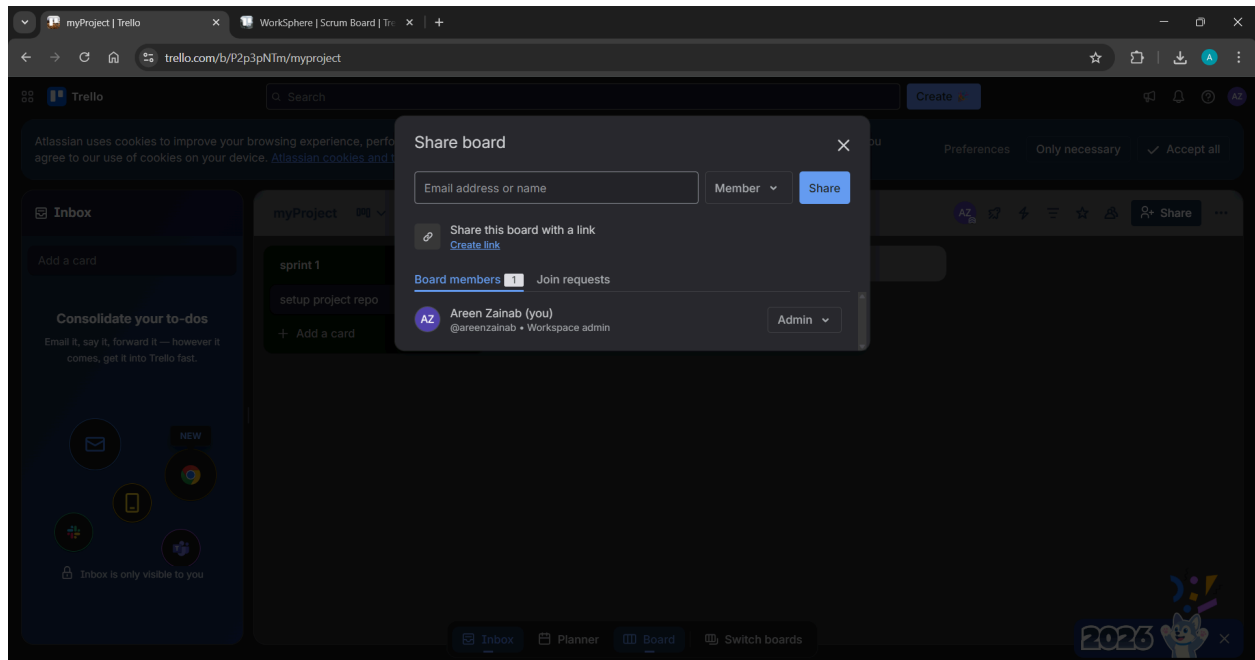

3. Under Board title enter your project name.
4. **Visibility:** Ensure it is set to "Workspace" so your teammates can see it.
5. Click **Create**.

6. To invite your team members to the workspace, Click on **share**

7. Enter the email addresses of your group members and click "**share**".

Part 3: Organizing Tasks

Trello uses a system of **Lists** (columns) and **Cards** (tasks).

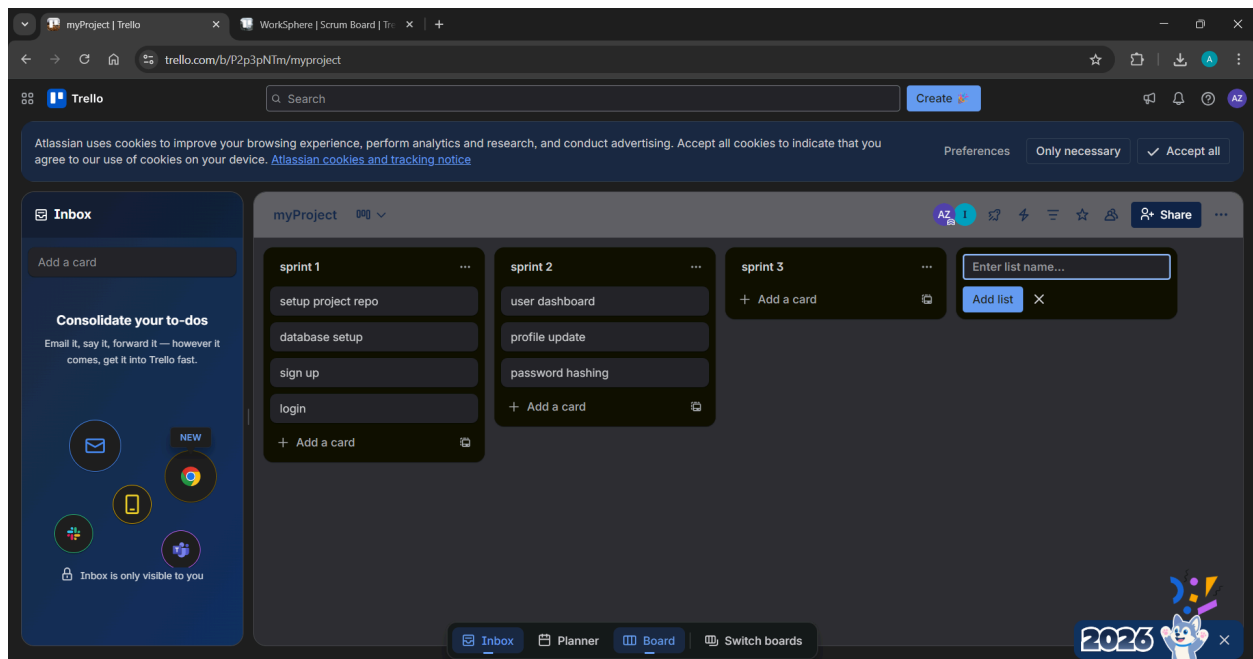

1. Set Up Your Lists

By default, Trello gives you three lists. We recommend renaming them to follow a simple workflow:

- **To Do:** All the tasks that need to be finished for the project.
- **Doing:** The specific tasks you are working on *right now*.
- **Done:** Tasks that are 100% complete and tested.

2. Adding Tasks (Cards)

1. Go to the **"To Do"** list.
2. Click **"+ Add a card"**.
3. Type the task name (e.g., "Design Login Page" or "Find Research Papers").
4. Press **Enter**.

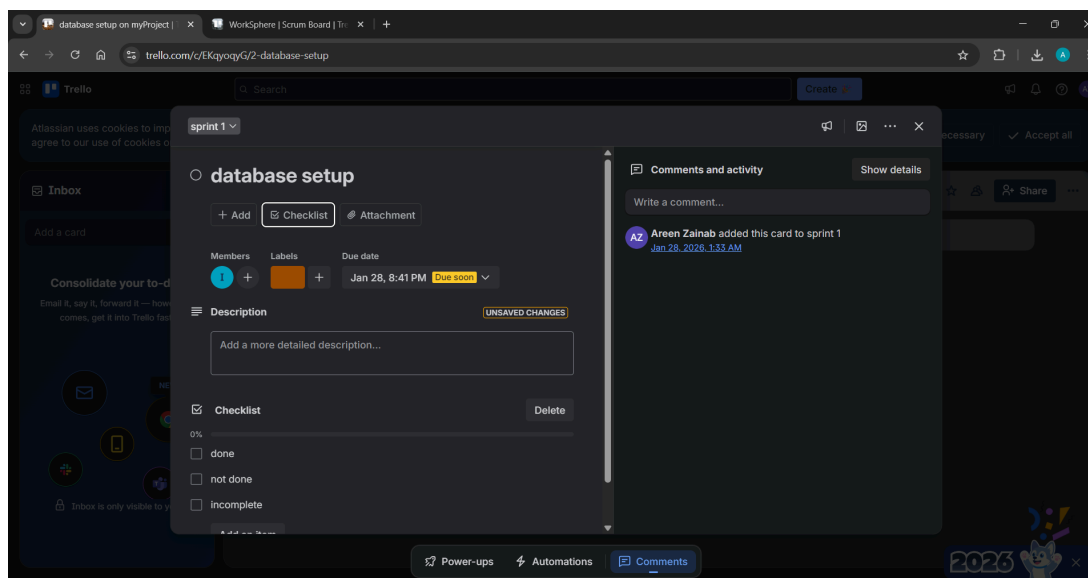

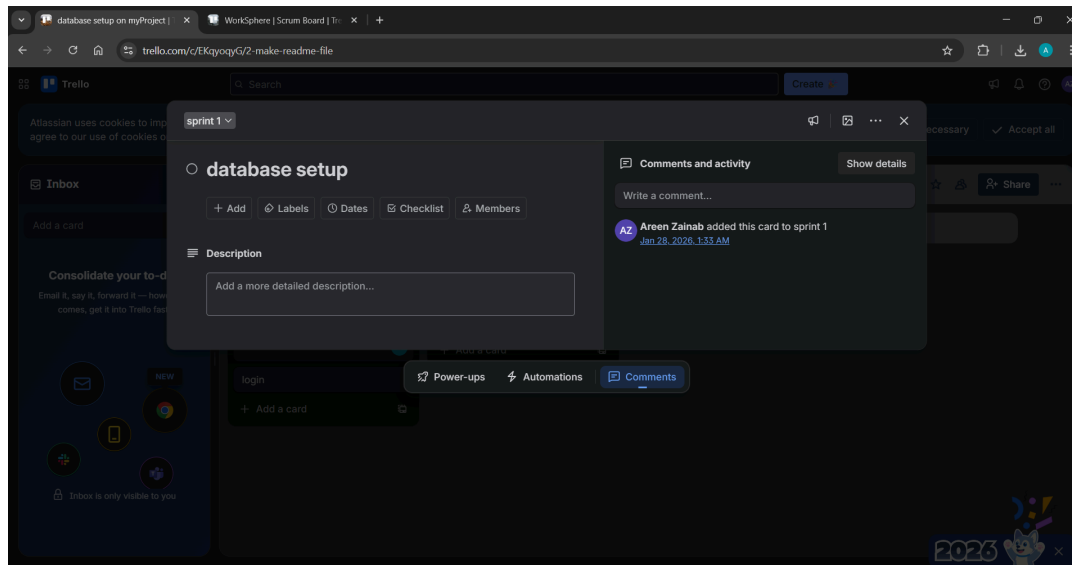

Part 4: Managing Card Details

Click on any card to open it and add more details. This is how you coordinate with your team.

- **Members:** Click **"Members"** on the right side and select a teammate. This assigns the task to them so everyone knows who is doing what.
- **Description:** Type specific instructions or requirements in the "Description" box.

- **Dates:** Click "**Dates**" to set a deadline. Trello will send a reminder when the task is due.
- **Checklists:** For big tasks, click "**Checklist**". This lets you break one big card into smaller sub-tasks (e.g., "Drafting Report" -> *Intro, Body, Conclusion*).
- **Attachments:** You can drag and drop files (PDFs, images, code snippets) directly onto a card.

How to Move a Task

- When you start working on a task, click and drag the card from **To Do** to **Doing**.
- When you finish, drag it to **Done**.
